PROFESSIONAL SUMMARY

Senior Frontend Developer with 6+ years of hands-on experience building enterprise SaaS platforms, LMS, CRM, and HRM systems. Expert in ReactJS, Next.js, and TypeScript with a strong full-stack foundation in PHP/Laravel and MySQL. Proven ability to architect scalable frontend solutions, optimize performance through SSR/SSG, implement real-time features via WebSocket, and build reusable component libraries and Design Systems. Passionate about writing clean, maintainable code and delivering high-impact products.

Additionally, I am developing Kinder CRM, a multi-tenant SaaS platform for preschool management, expanding my expertise in product architecture, business workflows, and end-to-end SaaS development.

Demo: <https://kindercrm.cudem.online>

PORTFOLIO

Portfolio includes real-world React.js, Next.js, and enterprise web application projects that I have developed and can present in detail during the interview.

TECHNICAL SKILLS

Frontend Frameworks

ReactJS • Next.js • Vue.js • TypeScript • JavaScript ES6+

State Management

Redux • Zustand • React Query • Context API

UI & Styling

HTML5 • CSS3 • SCSS • Bootstrap • TailwindCSS • ShadCN UI • Radix UI • Ant Design • Responsive UI • Web Accessibility • Multi-Language(react-i18next) • Ant Chart • ECharts

Architecture & Performance

Micro Frontend • Module Federation • Design System • Reusable Component Design • SSR • SSG • Code Splitting • Lazy Loading • Infinite Scroll • Caching • Performance Optimization

API & Real-time

REST API • Open API • WebSocket • Swagger • Axios • Fetch API • JWT Authentication • RBAC

Development Tools & Version Control

Git(commit, push, pull, rebase, merge) • GitHub • Gitlab • Docker • ESLint • Jira • Trello • Figma (Developer Handoff)

Testing & QA

React Testing Library • Unit Testing • E2E Testing • Cross-browser Testing

Backend

PHP • Laravel • MySQL • Redis • Docker • Audit Log • Websocket • Queue/Pusher

AI Assisted Development

Cursor • ChatGPT • Claude

Professional Skills

Code Review • Problem Solving • REST API Integration • Team Collaboration • Agile/Scrum

EDUCATION

Bachelor of Information Technology

Cao Thang Technical College

2016 - 2019 | Major: Information Technology

SOFT SKILLS

- **Leadership & Mentoring:** Led teams (3–4 members), mentored interns, performed code reviews
- **Problem Solving:** Strong analytical mindset focused on scalable, maintainable solutions
- **Ownership & Collaboration:** Proactive, accountable, experienced with cross-functional Agile/Scrum teams
- **Requirement Analysis:** Analyze business requirements and propose scalable technical solutions
- **Business Process Management (BPM):** Work with BA/PO to define workflow requirements for CRM, LMS, Logistics

KEY ACHIEVEMENTS

- **Enterprise Platform Impact:** Developed and deployed SaaS platforms serving 20+ businesses across HRM, Logistics, E-Learning, and Hosting domains
- **Performance Optimization:** Improved page load speed and user experience across production platforms through code splitting, SSR/SSG, and caching strategies.
- **Code Review:** Participated in code reviews to ensure coding standards and conventions, while helping improve overall code quality across the team.
- **Real-time Architecture:** Designed and implemented WebSocket integration for collaborative features and real-time data synchronization
- **Component Architecture:** Built reusable component libraries and standardized UI patterns reducing code duplication and improving development efficiency
- **Responsive UI:** Developed responsive applications optimized for desktop, tablet and mobile devices.
- **RBAC Systems:** Designed and implemented complex role-based access control (RBAC) and permission management systems for enterprise applications
- **Full-Stack Delivery:** Contributed to end-to-end product development including frontend UI, REST API integration, database schema design, and deployment
- **RESTful API:** Integrated RESTful APIs with ASP.NET Core, FastAPI, and Laravel backend services.

LANGUAGES

Vietnamese: Native

English: Reading technical documentation, writing, and technical communication.

WORK EXPERIENCE

Senior Frontend Developer

Oct 2025 - Present

The Mona Group – Mona Host

- Developed and maintained multiple enterprise SaaS platforms across E-Learning, CRM, and Hosting domains using Next.js, ReactJS and TypeScript.
- Designed and implemented an internationalization (i18n) system for the platform, enabling real-time language switching.
- Built reusable component libraries and standardized UI patterns, improving development efficiency and code maintainability.
- Built data analytics dashboards using Ant Charts to visualize lead metrics, KPIs, revenue and business data, enabling operational monitoring and data-driven decision-making.
- Optimized application performance and user experience through Server-Side Rendering (SSR) and Static Site Generation (SSG), while implementing responsive, mobile-first designs for seamless experiences across all screen sizes.
- Developed real-time features, including dashboards, notifications, and chat functionality, for the system.
- Collaborated on frontend architecture, code reviews, and cross-functional delivery with Product, UI/UX, Backend, and QA teams in Agile environments.
- Designed and implemented user interfaces for role-based access control (RBAC), permission management, and organization-level workspaces.
- Collaborated with the Backend team to analyze business requirements and design database schemas to support system development.
- Participated in the analysis, design, and development of IELTS and TOEIC standardized question types, ensuring compliance with official exam structures and international assessment standards QTI.

Junior → Middle → Senior Frontend Developer

Jul 2019 - Sep 2025

Faba Technology

- Developed and maintained enterprise platforms across Human Resource Management (HRM), Logistics CRM, and Transportation domains using ReactJS, VueJS, TypeScript, and Laravel.
- Built scalable and reusable frontend solutions, integrated RESTful APIs and WebSocket to deliver real-time features such as dashboards, notification and chat systems, and contributed to database design and implementation to support end-to-end product development.
- Developed secure file upload and preview functionality using Laravel REST APIs, integrating Amazon S3 for file storage and management.
- Streamlined business operations and workflows by centralizing customer, employee, contract, invoicing, payment, and customer service management into a unified platform, reducing manual processes and improving operational efficiency.
- Optimized application performance, improving page load speed and enhancing the overall user experience
- Worked closely with cross-functional teams to analyze business requirements, develop solutions, and deliver projects on schedule with high quality.
- Contributed to the successful development and operation of a WebApp platform that served more than 200 businesses within just one year of launch.

FEATURED PROJECTS

Edutify – Multi-tenant SaaS LMS

Multi-tenant education platform featuring LMS, online testing, CRM, course management, student management, question banks, scheduling, and learning progress tracking, real-time dashboards.

Tech: Next.js • TypeScript • Zustand • React Query • Ant Design • Ant Chart • Open API • WebSocket • Micro Frontend • RBAC

Live: <https://dash.edutify.io>

HPM - Hosting Provider Management SaaS

SaaS platform for managing hosting services, domain registration, customer accounts, subscriptions, billing, invoicing, support tickets, and service lifecycle.

Tech: Next.js • TypeScript • Zustand • React Query • ShadCN UI • Radix UI • Open API • Module Federation • RBAC

Live: <https://portal.system443.com>

The IELTS Workshop – Education CRM Platform

CRM platform for managing students, courses, enrollments, contracts, payments, and learning progress throughout the entire training lifecycle.

Tech: Next.js • TypeScript • Zustand • React Query • ShadCN UI • RESTful API

Live: <https://newcrm.tiw.vn>

Pasal LMS – Online Learning Management System

Online learning platform for managing courses, online assessments, examinations, student enrollment, and learning progress throughout the training journey.

Tech: Next.js • TypeScript • Zustand • React Query • ShadCN UI • RESTful API

Live: <https://online.pasal.edu.vn>

Qualee – Human Resource Management System (HRM)

Enterprise HRM system for managing employee records, attendance, leave requests, onboarding, internal workflows, performance management, and real-time team communication through integrated chat features.

Tech: ReactJS • TypeScript • Redux • Router, Styled-components • EChart • Laravel • RESTful API • WebSocket • Docker

Live: <https://console.qualee.com>

PNP Global Supply – Logistics CRM Platform

Logistics CRM platform that streamlines customer management, order processing, shipment tracking, contract management, and logistics operations from planning to delivery.

Tech: ReactJS • React Query • Ant Design • Ant Chart • Laravel • MySQL • Docker • WebSocket

Live: <https://console.pnpglobalsupply.com>
