INTRODUCTION

I am a **Senior Frontend Developer** with **6+ years** of experience building web applications and **SaaS** products using **ReactJS**, **Next.js**, and **TypeScript**. I have extensive experience developing high-performance, responsive user interfaces and delivering complex systems such as **LMS**, **CRM**, and **HRM** platforms. With a strong Fullstack foundation in **PHP/Laravel** and **MySQL**, I effectively bridge frontend and backend development to build scalable, maintainable, and reliable applications.

TECHNICAL SKILLS

Frontend

ReactJS, Next.js (SSR, SSG, Routing), TypeScript, React Hook Form, Redux Toolkit, Zustand, React Query (TanStack Query), Context API, Chart.js

UI & Styling

HTML5, CSS3, SCSS, Tailwind CSS, ShadCN UI, Ant Design, Ant Chart, Styled-components, Responsive Design

API & Real-time

RESTful APIs, Axios, Fetch API, WebSocket, Real-time Data Synchronization, Sorting, Filtering, Pagination

Backend (Supporting Skills)

PHP, Laravel, MySQL, Docker, Queue/Pusher, Cron Jobs, Redis (Caching, Queue)

Leadership

Code Review, Technical Mentoring, Team Collaboration, Agile/Scrum, Jira, Trello

Architecture & Performance

Component Architecture, Design System, Reusable Component Design, Lazy Loading, Code Splitting, Performance Optimization, SEO optimization, Web Accessibility (WCAG)

Testing

React Testing Library, Unit Testing, E2E Testing

Version Control

Git, Git Flow, Pull Requests, Code Review, Conflict Resolution

AI-assisted Development

GitHub Copilot, Cursor, ChatGPT, Claude

JWT Authentication

Role-Based Access Control (RBAC), Permission Management

SOFT SKILLS

- **Leadership & Mentoring:** Led small teams (3–4 members), mentored interns, and performed code reviews.
- **Problem Solving:** Strong analytical mindset with a focus on scalable, maintainable solutions.
- **Ownership & Collaboration:** Proactive, accountable, and experienced working effectively with cross-functional Agile/Scrum teams.
- **Requirement Analysis:** Experienced in analyzing business requirements and proposing scalable technical solutions.

EDUCATION

Cao Thang Technical College

Major: Information Technology

2016 – 2019

LANGUAGES

Vietnamese: Native

English: Reading, writing, and technical communication

WORK EXPERIENCE

The Mona Group – Mona Host

Senior Frontend Developer

Oct 2025 – Present

Summary

- Developed and maintained multiple enterprise SaaS platforms across **E-Learning, CRM, and Hosting** domains using **Next.js, ReactJS** and **TypeScript**.
- Built reusable component libraries and standardized UI patterns, improving development efficiency and code maintainability.
- Enhanced application performance and user experience through **SSR/SSG**, responsive design, and integration with **RESTful APIs** and **WebSocket** services.
- Collaborated on frontend architecture, code reviews, and cross-functional delivery with Product, UI/UX, Backend, and QA teams in Agile environments.

Key Projects

Edutify – SaaS E-Learning Platform (LMS, Test Platform & CRM)

Tech Stack: Next.js, TypeScript, Zustand, React Query, Ant Design, RESTful API, WebSocket

- Developed a multi-tenant education platform featuring LMS, online testing, CRM, course management, student management, question banks, scheduling, and learning progress tracking.
- Built scalable and reusable frontend modules while enabling real-time data synchronization through WebSocket integration.
- **Live:** <https://dash.edutify.io>

Hosting Provider Management (HPM)

Tech Stack: Next.js, TypeScript, Zustand, React Query, ShadCN UI, RESTful API

- Developed a SaaS platform for managing hosting services, domains, customers, billing, invoicing, and support workflows.
- Designed reusable and responsive interfaces with a focus on scalability and maintainability.
- **Live:** <https://portal.system443.com>

The IELTS Workshop (CRM)

Tech Stack: Next.js, TypeScript, Zustand, React Query, ShadCN UI, RESTful API

- Developed CRM modules for student management, courses, contracts, and payment workflows.
- Converted Figma designs into production-ready interfaces and established reusable component patterns.
- **Live:** <https://newcrm.tiw.vn>

Pasal LMS

Tech Stack: Next.js, TypeScript, Zustand, React Query, ShadCN UI, RESTful API

- Contributed to an online learning platform with course management, assessments, online testing, and learning progress tracking.
- Improved frontend performance and reduced duplicated UI code through reusable component architecture.
- **Live:** <https://online.pasal.edu.vn>

Summary

- Promoted from **Junior Frontend Developer** to **Senior Frontend Developer** through consistent technical contributions, ownership of key product features, and active involvement in architecture discussions and code reviews.
- Developed and maintained enterprise platforms across **Human Resource Management (HRM)**, **Logistics CRM**, and **Transportation** domains using **ReactJS**, **VueJS**, **TypeScript**, and **Laravel**.
- Built scalable and reusable frontend solutions, integrated **RESTful APIs** and **WebSocket** services, and collaborated on full-stack development to deliver end-to-end business applications.
- Worked closely with Product Managers, Business Analysts, UI/UX Designers, Backend Engineers, and QA teams in Scrum environments.

Key Projects

Qualee – Human Resource Management (HRM)

Tech Stack: ReactJS, TypeScript, Laravel, RESTful API, WebSocket

- Developed a cloud-based HRM platform featuring employee management, attendance tracking, leave management, onboarding workflows, internal processes, and a drag-and-drop email template builder.
- Built scalable frontend modules, integrated real-time services, and contributed to frontend architecture and code quality initiatives.
- **Live:** <https://console.qualee.com>

PNP Global Supply – Logistics CRM

Tech Stack: ReactJS, Ant Design, PHP/Laravel, MySQL, Docker, WebSocket

- Developed a logistics CRM platform supporting customer management and operational workflows.
- Contributed to frontend and backend development, including API implementation, database design, feature enhancements, and performance optimization.
- **Live:** <https://console.pnpglobalsupply.co>

Transportme – Bus Transportation Platform

Tech Stack: VueJS, Vuetify, PHP/CodeIgniter, MySQL, Docker

- Contributed to the development of a transportation management platform with responsive interfaces and business-driven features.
- Supported backend development, database design, and ongoing system optimization to improve system stability and user experience.
- **Live:** <https://transportme.com.au>
