

NGUYEN PHI TRUONG

Senior Frontend Developer

Email: truongnguyen1998.dev@gmail.com

Phone: 0399812700

Address: Go Vap, Ho Chi Minh

Date of birth: 08/02/1998

Portfolio: <https://myprofile.cudem.online>

INTRODUCTION

I am a Frontend Developer with over **5 years of experience** in developing web applications and SaaS platforms. Proficient in **ReactJS, Next.js, TypeScript**, HTML5, and CSS3, with strong expertise in building responsive, mobile-first user interfaces. Experienced in developing **E-Learning (LMS), CRM, HRM, HPM**, and enterprise management systems.

With a Fullstack background in **PHP/Laravel and MySQL**, I am able to collaborate effectively across both frontend and backend development throughout the product lifecycle. I have hands-on experience translating Figma designs into production-ready applications, integrating **RESTful APIs and WebSocket** services, and optimizing application performance and user experience. Additionally, I have contributed to code reviews, frontend architecture design, and the implementation of software development best practices within **Agile/Scrum** environments.

TECHNICAL SKILLS

Frontend

ReactJS(Hooks, Context API, Custom Hooks), Next.js (SSR, SSG), Redux, Zustand, React Query, Component Lifecycle, TypeScript

UI & Styling

HTML5, CSS, SCSS, Grid, Flexbox, responsive UI, TailwindCSS, Ant Design, ShadCN, Styled-components

Performance & SEO

Lazy loading, Code splitting, Clean code, tối ưu SSR/SSG, Web Accessibility (WCAG)

Testing

JReact Testing Library, Unit Test

Backend

PHP, Laravel framework, Docker, MySQL, Pusher, Cronjob

API & Data

RESTful API, Axios/Fetch, Realtime, WebSocket

Git Workflow

Git Flow, Feature Branch, Pull Request (PR), Code Review, Conflict Resolution

AI-assisted Development

Cursor AI, GitHub Copilot, ChatGPT, Claude

SOFT SKILLS

- **Problem-Solving & Analytical Thinking:** Strong ability to analyze business requirements, troubleshoot issues, debug applications, and optimize system performance effectively.
- **Communication & Collaboration:** Effective collaboration with Product Owners, Business Analysts, UI/UX Designers, QA Engineers, and Backend Developers in Agile/Scrum(Jira, Trello) environments.
- **Business Analysis:** Capable of understanding English documentation, analyzing requirements, and translating business needs into technical solutions.
- **Work Management:** Able to work independently or collaboratively while maintaining high quality and meeting deadlines in fast-paced environments.
- **Leader/Mentor:** Có kinh nghiệm lead small team(3-4 thành viên), mentor intern.
- **Ownership & Responsibility:** Committed to product quality, development best practices, and proactively supporting team members to achieve project goals.

WORK EXPERIENCE

Senior Frontend Developer

07/2025 – Hiện tại

The Mona Group - Mona Host

Project: SaaS E-Learning (LMS) – Edusavvy

Technologies: Next.js, TypeScript, ShadCN UI

- Designed, developed, and maintained a SaaS-based education ecosystem, including Test Platform, LMS, and CRM products.
- Built responsive and reusable user interfaces from Figma designs, ensuring consistency and an optimal user experience.
- Developed modules for student management, courses, classes, schedules, examinations, question banks, CRM, and learning progress tracking.
- Optimized application performance, scalability, and system reliability to support multi-tenant operations.
- Integrated RESTful APIs, WebSocket, and real-time data synchronization across multiple modules.
- Conducted code reviews, contributed to frontend architecture, and enforced software development best practices.
- Collaborated closely with Product Owners, UI/UX Designers, and Backend Developers within Agile/Scrum teams to develop, enhance, and maintain products.

Link: <https://dash.edusavvy.io>

Project: SaaS HPM – Hosting Provider Management

Technologies: Next.js, TypeScript, ShadCN UI

- Designed and developed a SaaS-based Hosting Provider Management (HPM) platform.
- Built reusable and responsive interfaces based on Figma designs, ensuring consistency and usability.
- Improved application performance, scalability, and overall system stability.
- Integrated RESTful APIs, WebSocket, and real-time synchronization features.
- Contributed to frontend architecture design, code reviews, and software development standards.
- Collaborated with Product, UI/UX, and Backend teams following Agile/Scrum methodologies.
- Developed modules for customer management, hosting plans, domains, billing, invoicing, and technical support workflows.

Link: <https://portal.system443.com>

Project: CRM – The IELTS Workshop (TIW)

Technologies: Next.js, TypeScript, ShadCN UI

- Developed and enhanced a CRM platform for managing students, courses, contracts, and payments.
- Transformed Figma designs into production-ready interfaces and developed reusable component libraries.
- Integrated RESTful APIs, WebSocket, and internal services for real-time data synchronization.
- Participated in frontend architecture design, code reviews, and team mentoring activities.
- Worked closely with UI/UX Designers and Backend Developers to deliver new features and system improvements.

Link: <https://newcrm.tiw.vn>

Project: LMS – Pasal LMS

Technologies: Next.js, TypeScript, ShadCN UI

- Contributed to the development and enhancement of an LMS platform supporting online testing, student management, course management, classes, assessments, and learning progress tracking.
- Built reusable and responsive user interfaces based on Figma designs.
- Conducted code reviews, developed shared components, and contributed to the frontend architecture of the platform.
- Collaborated with UI/UX Designers and Backend Developers to deliver product enhancements and new features.

Senior Frontend Developer

Faba Technology

Project: SAP HR – Qualee Human Resource Management

Technologies: ReactJS, TypeScript, Laravel

- Participated in the design and development of the Qualee Human Resource Management (HRM) platform using ReactJS, TypeScript, and Laravel.
- Developed modules for employee management, employee profiles, attendance tracking, leave management, internal workflows, onboarding processes, and a drag-and-drop email template builder.
- Integrated RESTful APIs, WebSocket, and real-time data synchronization features across the platform.
- Conducted code reviews, contributed to frontend architecture, and applied software development best practices.
- Collaborated with Project Managers (PM), Business Analysts (BA), UI/UX Designers, and Backend Developers following Scrum methodologies to develop and enhance the product.

01/2023 – 06/2025

Middle Frontend Developer

Faba Technology

Project: Logistics CRM – PNP Global Supply

Technologies: ReactJS, Ant Design, WebSocket, PHP/Laravel, MySQL, Docker

- Participated in the development of the Logistics CRM system (PNP Global Supply) using ReactJS, Ant Design framework, and WebSocket.
- Developed backend services and designed databases using PHP/Laravel, MySQL, and Docker.
- Built new features, fixed bugs, optimized the system, and conducted code reviews.
- Supported team members, participated in mockup design, and transformed designs into fully implemented product features.

01/2023 – 12/2023

Frontend Developer

Faba Technology

Project: Transportme – AU Bus Transportation Platform

Technologies: VueJS, Vuetify, PHP/CodeIgniter, MySQL, Docker

- Participated in the development and enhancement of the Transportme passenger transportation management platform using VueJS, Vuetify, and CodeIgniter.
- Built user interfaces from design concepts to full implementation, ensuring consistency and a seamless user experience.
- Contributed to backend development and database design using PHP/CodeIgniter, MySQL, and Docker.
- Developed new features, fixed bugs, and optimized system performance.

07/2019 – 12/2022

KEY STRENGTHS

- Frontend:** ReactJS, Next.js, TypeScript, React Query, Zustand, Redux, HTML5, CSS3, SCSS, Tailwind CSS, Styled Components
- UI Frameworks:** Ant Design, ShadCN UI
- Backend:** PHP, Laravel, MySQL, RESTful API, WebSocket
- Tools:** Git, GitLab, Bitbucket, Docker, Cursor, Jira, Trello
- Practices:** SSR, SSG, Responsive Design, Mobile-First, Performance Optimization, Agile/Scrum

EDUCATION

Cao Thang Technical College
Major: Information Technology
2016 – 2019

LANGUAGES

Vietnamese: Native
English: Reading, writing, and technical communication
