PROFESSIONAL SUMMARY

Senior Frontend Developer with 6+ years of hands-on experience building enterprise SaaS platforms, LMS, CRM, and HRM systems. Expert in React.js, Next.js, and TypeScript with strong full-stack foundation (PHP/Laravel, MySQL). Proven ability to architect scalable frontend solutions, optimize performance through SSR/SSG, implement real-time features via WebSocket, and lead cross-functional teams. Experienced in component architecture, design systems, and mentoring junior developers. Passionate about writing clean, maintainable code and delivering high-impact products.

TECHNICAL SKILLS

Frontend Frameworks

React.js • Next.js • Vue.js • TypeScript • JavaScript ES6+

State Management

Redux • Zustand • React Query • Context API

UI & Styling

HTML5 • CSS3 • SCSS • TailwindCSS • ShadCN UI • Radix UI • Ant Design • Responsive Design • WCAG • ECharts • Ant Chart

Architecture & Performance

Micro Frontend • Module Federation • Design System • Reusable Component Design • SSR • SSG • Code Splitting • Lazy Loading • Caching • Performance Optimization

API & Real-time

REST API • WebSocket • Swagger • Axios • Fetch API • JWT Authentication • RBAC

Development Tools & Version Control

Git • GitHub • Gitlab • Docker • ESLint • Jira • Trello

Testing & QA

React Testing Library • Unit Testing • E2E Testing • Cross-browser Testing

Backend

PHP • Laravel • MySQL • Redis • Docker • Audit Log • Websocket • Queue/Pusher

AI Assisted Development

Cursor • ChatGPT • Claude

Professional Skills

Code Review • Team Collaboration • Agile/Scrum

SOFT SKILLS

- Leadership & Mentoring:** Led teams (3–4 members), mentored interns, performed code reviews
- Problem Solving:** Strong analytical mindset focused on scalable, maintainable solutions
- Ownership & Collaboration:** Proactive, accountable, experienced with cross-functional Agile/Scrum teams
- Requirement Analysis:** Analyze business requirements and propose scalable technical solutions
- Business Process Management (BPM):** Work with BA/PO to define workflow requirements for CRM, LMS, Logistics

KEY ACHIEVEMENTS

- Enterprise Platform Impact:** Developed and deployed SaaS platforms serving 20+ businesses across HRM, Logistics, E-Learning, and Hosting domains
- Performance Optimization:** Improved page load speed and user experience across production platforms through code splitting, SSR/SSG, and caching strategies
- Real-time Architecture:** Designed and implemented WebSocket integration for collaborative features and real-time data synchronization
- Component Architecture:** Built reusable component libraries and standardized UI patterns reducing code duplication and improving development efficiency
- RBAC Systems:** Designed and implemented complex role-based access control (RBAC) and permission management systems for enterprise applications
- Team Leadership:** Led frontend architecture decisions, performed code reviews, and mentored junior developers on best practices and scalable solutions
- Full-Stack Delivery:** Contributed to end-to-end product development including frontend UI, REST API integration, database schema design, and deployment
- International Standards:** Implemented IELTS and TOEIC standardized question types with QTI (Question & Test Interoperability) compliance

EDUCATION

Bachelor of Information Technology

Cao Thang Technical College

2016 - 2019 | Major: Information Technology

LANGUAGES

Vietnamese

Native

English

Reading, writing, and technical communication

WORK EXPERIENCE

Senior Frontend Developer

Oct 2025 - Present

The Mona Group – Mona Host

- Developed and maintained multiple enterprise SaaS platforms across E-Learning, CRM, and Hosting domains using Next.js, ReactJS and TypeScript.
- Built reusable component libraries and standardized UI patterns, improving development efficiency and code maintainability.
- Optimized application performance and user experience through Server-Side Rendering (SSR) and Static Site Generation (SSG), while implementing responsive, mobile-first designs for seamless experiences across all screen sizes.
- Developed real-time features, including dashboards, notifications, and chat functionality, for the system.
- Collaborated on frontend architecture, code reviews, and cross-functional delivery with Product, UI/UX, Backend, and QA teams in Agile environments.
- Designed and implemented user interfaces for role-based access control (RBAC), permission management, and organization-level workspaces.
- Collaborated with the Backend team to analyze business requirements and design database schemas to support system development.
- Participated in the analysis, design, and development of IELTS and TOEIC standardized question types, ensuring compliance with official exam structures and international assessment standards QTI (Question & Test Interoperability).

Junior → Middle → Senior Frontend Developer

Jul 2019 - Sep 2025

Faba Technology

- Developed and maintained enterprise platforms across Human Resource Management (HRM), Logistics CRM, and Transportation domains using ReactJS, VueJS, TypeScript, and Laravel.
- Built scalable and reusable frontend solutions, integrated RESTful APIs and WebSocket to deliver real-time features such as dashboards, notification and chat systems, and contributed to database design and implementation to support end-to-end product development.
- Developed secure file upload and preview functionality using Laravel REST APIs, integrating Amazon S3 for file storage and management.
- Streamlined business operations and workflows by centralizing customer, employee, contract, invoicing, payment, and customer service management into a unified platform, reducing manual processes and improving operational efficiency.
- Optimized application performance, improving page load speed and enhancing the overall user experience
- Worked closely with cross-functional teams to analyze business requirements, develop solutions, and deliver projects on schedule with high quality.
- Contributed to the successful development and operation of a WebApp platform that served more than 200 businesses within just one year of launch.

FEATURED PROJECTS

Edutify – SaaS E-Learning Platform

Multi-tenant education platform featuring LMS, online testing, CRM, course management, student management, question banks, scheduling, and learning progress tracking.

Tech: Next.js • TypeScript • Zustand • React Query • Ant Design • Open API • WebSocket • Micro Frontend • Module Federation

Live: <https://dash.edutify.io>

Hosting Provider Management (HPM)

SaaS platform for managing hosting services, domains, customers, billing, invoicing, and support workflows with scalable and responsive interfaces.

Tech: Next.js • TypeScript • Zustand • React Query • ShadCN UI • Open API

Live: <https://portal.system443.com>

The IELTS Workshop (CRM)

CRM platform for managing students, courses, contracts, and payment workflows with production-ready interfaces and reusable component patterns.

Tech: Next.js • TypeScript • Zustand • React Query • ShadCN UI • RESTful API

Live: <https://newcrm.tiw.vn>

Pasal LMS – Online Learning Platform

Online learning platform with course management, assessments, online testing, and learning progress tracking with optimized performance through component reusability.

Tech: Next.js • TypeScript • Zustand • React Query • ShadCN UI • RESTful API

Live: <https://online.pasal.edu.vn>

Qualee – Human Resource Management Platform

Enterprise HRM system featuring employee management, attendance tracking, leave management, onboarding workflows, internal business processes, and drag-and-drop email builder.

Tech: React.js • TypeScript • Redux • Styled-components • Laravel • RESTful API • WebSocket

Live: <https://console.qualee.com>

PNP Global Supply – Logistics CRM

Logistics CRM platform supporting customer management and operational workflows with full-stack development including API implementation and database design.

Tech: React.js • React Query • Ant Design • PHP/Laravel • MySQL • Docker • WebSocket

Live: <https://console.pnglobalsupply.com>

Transportme – Vehicle Ticketing & Tracking

Patented software system for vehicle ticketing and tracking with responsive interfaces, business-driven features, and WCAG web accessibility compliance.

Tech: Vue.js • Vuetify • PHP/Codelgniter • MySQL • Docker • Web Accessibility (WCAG)

Live: <https://transportme.com.au>

E-Commerce Platforms

Multiple e-commerce platforms built with Vue.js, Next.js, WordPress, and Shopify featuring responsive design, performance optimization, and security enhancements.

Tech: Vue.js • Next.js • WordPress • Shopify • Responsive Design

Live: <https://dragun-beauty.com> • <https://unitedpharma.com.vn>

PROFESSIONAL PROJECTS

Kinder CRM - SaaS Preschool Management Platform

Developed KinderCRM, a Cloud SaaS platform that digitizes preschool management, including admissions, student management, classrooms, teachers, tuition, and parent communication

Tech: Next.js • TypeScript • Zustand • React Query • ShadCN UI • Supabase Cloud

Live: <https://kindercrm.cudem.online>
